

Lutheran Bible Translators

Elliot and Serena Derricks Translation and Office Building Support

\$5,000

Thank you for helping to put God's Word into the hands of the Subula* people. Elliot and Serena Derricks work with Lutheran Bible Translators in Cameroon with a language group called Subula. Though the Subula speaking people currently align with another major world religion, many people are thirsty for God's Word in their language.

John* is eager to have God's Word, and wants it for his Subula people. John grew up with a spiritual hunger, without the Bible in his language. He memorized many passages from the holy writings of another religion and as a small boy pledged his life to the prophet of that religion. When he turned 20, John had a vision of Jesus. Jesus asked John to follow Him. John did and never looked back. He is now a vital member of the Subula translation and literacy team. He loves raising awareness among his Subula area villages and getting people excited about God's Word in the Subula language.

The Subula Translation and Literacy team is temporarily located in the Derricks Family home in the village where they live among the Subula people. Work will progress much better when the growing team has a proper workspace.

Your mites will enable the Subula people to build a translation and literacy center that will serve as a base for the work of translating the Bible into the Subula language. It will help John to do his job of promoting the development of the Subula language through Bible Translation and literacy even better.

God loves the Subula people and wants them to know His love for them through the language they know best, the language their mothers spoke to them when they were small, the language of their hopes and dreams. The language Jesus spoke to John when he converted to Christianity.

Your mites are a powerful way God will use people like the Derricks family, John, and many other Subula to build His kingdom among the Subula people in Cameroon.
